

Visit to ENI High Performance Computing Center

Thursday June 14th

Join us in touring one of the most powerful industrial supercomputers in the WORLD! This supercomputer, generally used in seismic and reservoir engineering numerical simulation processing, can perform at a peak of 18.6 Petaflop /s. Not only has ENI increased the processing power but they have also done this in a Green and environmentally conscious way.

Cost of the ticket is 24€ per person and includes the bus trip from Polito to their facility in Ferrera Erbagone and back to Torino.

JOIN US FOR THE TOUR!

R.S.V.P. to valentina.socco@polito.it and segpolito@gmail.com as soon as possible!
